

CINEMATIC P20

MAGNA

Cinematic by Magna combines power, clarity and control with reference quality with a design that allows each speaker to be customized when it needs to be apparent, installed in-ceiling or in-wall, or with a simple, low-cost design when they can be installed in hidden theater, being invisible, standing out only for the sound quality.

P20 is usually used for front channels, but increase precision when used as surround. For easy installation, optional on-wall bracket is available with an incredible decoupled system.
